Signalling for Technicians

Module 2

Principles of Relays Operation and Use

This page is intentionally left blank

Contents

1	**About this Open Learning Module**	**1**
2	**Relay Component Identification**	**5**
	Introduction	5
	Coil	9
	Yoke	9
	Armature	9
	Residual Pin	9
	Contacts	10
	Buffer Bar	11
	Spring Contacts	12
	Base Plate	12
	Relay Casing	12
	Seal	13
	Configuration Pin Coding	14

	Plug board	15
	Retaining Clip	16
	Relay Labelling and Marking	16
	Spades	18
	Beads	20
	Interconnections and Contact Stacks	22
	Section Summary	22
3	**Operation of a DC Neutral Relay**	**25**
	Introduction	25
	Relay Operation	25
	Section Summary	35
4	**Main Relay Types**	**39**
	Introduction	39
	Neutral Relay	41
	AC Immune Relay	42

	Double Wound Relay	44
	Twin Relay	46
	Slow to Pick Relay	48
	Slow to Release Relay	50
	Biased Relay	52
	Magnetically Latched Relay	54
	Polar Stick Relay	56
	Contactor Relays	58
	Timing Relays	59
	AC Vane Relays	68
	Section Summary	70
5	**The Relay Room and Location Cases**	**73**
	Introduction	73
	Relay Room Layout	**74**
	Relay Rack Profile	**76**
	Location Case Profiles	**78**
	Section Summary	**80**

6	**Module Summary**	**81**
7	**Self Test Questions**	**83**
8	**Answers**	**87**
9	**Glossary of Terms**	**95**
