Signalling for Technicians

Module 6

Principles of Signalling Power Supplies

This page is intentionally left blank

Contents

Introduction to Signalling Power Supplies	1
Need for Power Supplies	**1**
Batteries	1
Transformers	1
Transformer Rectifiers	2
Safety	2
The Electrical Cell	**4**
Construction of the Electrical Cell	4
Connecting Cells Together	4
Internal Resistance of a Cell	8
Self-Assessment Questions	10

Primary Cells **12**

Construction of a Primary Cell 12

Use of Primary Cells 14

Types of Primary Cell 14

Assignment 1 17

Testing Primary Cells 17

Assignment 2 20

Self-Assessment Questions 23

Lead Acid Cells **24**

Construction of a Lead Acid Cell 24

The Plates 24

The Electrolyte 26

Assignment 4 26

Testing Lead Acid Cells 28

Physical Inspection 28

Voltage Check 30
Measuring Specific Gravity 32
Self-Assessment Questions 34
Alkaline Cells 36
Construction of an Alkaline Cell 36
Testing Alkaline Cells 38
Assignment 5 40
Self-Assessment Questions 40
Charging a Battery 42
Electrical Storage Capacity 42
Self-Assessment Questions 43
Charging Secondary Cells 43
Assignment 6 46
Self-Assessment Questions 48

Transformers **50**

The Transformer 50

Voltage Control 52

Isolating Transformers 54

Transformer Design 56

Self-Assessment Questions 58

Transformer Rectifiers **60**

Need for a Rectifier 60

The Rectifier 60

The Transformer Rectifier 62

Assignment 7 62

Self-Assessment Questions 62

Safety **65**

Safety and Power Supplies 65

Safety Precautions 66

First Aid 68

Assignment 8 68

Self-Assessment Questions 68

Summary 69

Need for Power Supplies 69

Batteries 69

Transformers 70

Transformer Rectifiers 70

Safety 70

Self-Test **72**

Answers **78**

Glossary **79**
